

## Learning English The Fun Way

Hello there! I'm Nadila and will be 18 years old this May. I attended Brillington School Leavers Programme.

I've been learning English since I was a little girl and thankfully I had no major problems with it. To me, English is always fun, exciting and equally important like my native language, Malay. However, I found it very different at school as the lessons were tedious and very boring. I also had problems conversing in English eloquently due to discouragement from my peers.

After SPM, I decided to take up an English course to improve my communication skills and to just become a better person. Hence, that is where Brillington came in. I chose Brillington as it offers real-life situations which will be handy in the future. After a few classes, I knew that I made the right choice and I could see my communication skills improved for the better. Through Brillington, I have been able to meet new interesting people who quickly became my good friends.

Besides that, the class was conducive, spacious and just comfortable. The tutors, too, like Mr. David and Mr. John were very kind and helpful. They taught us many things and encouraged us to be the best in everything we do. They gave a new definition in learning English and made the class so much fun with their brilliant ideas.

Overall, Brillington was a good experience and I totally recommend this place to everyone. As a matter of fact, I've already asked my mum to enroll my sister for this programme in the future. Thanks to Brillington, I'll be able to take a step into the next phase of my life, confidently.

**THANK YOU SO MUCH, BRILLINGTON!**
