

Hello everyone. My name is Nazri bin Ramli. I am 17 years old, for now, I lived in Setiawangsa, Kuala Lumpur and I am from Terengganu.

Before I attended the SPM Leaver's Programme at Brillington English Centre, I was very weak in English especially in speaking and interaction with people. My sister suggested I enroll here to learn in preparation for university learning.

At first, I did not want to come because I was too shy. I just don't know how to speak English, but I considered about my future and my family. I am glad I enrolled. In my first class, I met many people that I had never met before. As usual, I was really shy that I was afraid to look

up. I also had low self-confidence. Luckily, my tutor, Mr. David gave me support and said "Mr. Nazri, just talk and don't 'malu-malu'!" Haha...he sounds funny when I knew he could speak Malay too.

After a couple of weeks, I could speak English smoothly and confidently and I knew how to communicate better. At times, I could feel the power of real English. In addition, I met many friends mostly from Kuala Lumpur and some from Kelantan. They were very kind and friendly. Moreover, Brillington has many excellent tutors like Mr. David, Mr. John, Mr. Assad, Mrs. Nan Nee and Ms. Sabrina. They were also very friendly and encouraging. We learned together, gave opinions when we work together in a team.

In learning sessions, we have learnt many things that it would be a new lesson to me and for the future. We learnt how to write cover letters, resumes, have debates and singing. We also shared stories about our experiences.

There were many fun activities and games like throw the dice and others, but the best for me was the KLCC field trip. We did many activities during the field trip especially when we had to speak English with tourists to get information, experiences, and their opinions about Malaysia. That was the first time I could speak English confidently in public. Wow!! I don't believe in myself, but I just use English from what I have learnt from Brillington.

So, what people say "nothing is impossible" is true. We can do it if we want it and Brillington made me realized all this. Yeah, it has changed me a lot.
