

MY EXPERIENCE AT BRILLINGTON

Assalamualaikum and hello everyone. My name is Nur Aisyah Binti Hassan and I live in KL, Bandar Baru Sentul.

I'm turning 18 this 3rd August. I felt very happy to join this centre because it's not all about studying, but also experiencing many other things and that's what I'm grateful about. I have learned something new which I couldn't get during my school days. I also make some friends and I'm happy with that. They all are very nice and friendly.

Before I joined this centre, my English was not very good especially when I have to speak with other people in English, and in writing as well. Here I had lots of practices in conversations and learned lots of vocabulary. I also got a lot of motivation to be successful in my life from the inspiration provided by Mr. David and Mr. John. They also gave many words of encouragement to me and that make me very thankful to them. With this experience, hopefully I did not waste my father's money used to send me here.

After a few months here at Brillington, I can see the changes in my life is I'm able to speak in English better than before and I have also gain some confidence to have a conversation in English with people. I can see the improvement in me even when I speak, sometimes look a little bit stress, but I know I'm trying my best and I put lots of effort in it. The facilities provided at Brillington also very comfortable and I like the environment. It is suitable for students coming to learn. The tutors also are very nice and friendly and I like way they conveyed English with students here.

I love learning here and it is obviously not wasting my time. So many experiences I had at Brillington and I will definitely miss this place, but what I will keep is the memory of what I've learned at this centre.
